JBW Systems has been in business for almost 20 years when they sold their first conical turbine impeller and now JBW's patented mixing products are sold globally. In the past few years, JBW has added several new innovative products to their already popular JBW mixing line. The have also received CE approval for sales in Europe.

Among the added products:
- JBW Lift Mixing System (mixer on a vertical lift) with control equipment, safety features (optional pump)
- JBW SlimLine Tote® Mixer (for use in tanks with a six inch opening)
- JBW Bung/Drum Mixer with down-sized conical turbine impellers to fit in a bung opening
- JBW Lite-Weight Aluminum Mixers for standard drum and tote® containers
- JBW Food-grade Impeller

Producing an agitator that provides superior mixing for their customers has always been a primary focus for JBW Systems. In addition, JBW has a commitment to customer service and ships within 24-48 hours ARO with the exception of custom made units. Every item that leaves the JBW facility in Central Ohio goes through rigorous quality control procedures.
